**FOR IMMEDIATE RELEASE**

## **What Your FEET Can Tell You about Your Spinal Health**

### ***Local Chiropractor Acquires New Digital Technology***

**November 27, 2007** – Dr. **Anthony J. Surrusco** is pleased to announce the addition of the Foot Levelers Associate™ Platinum to his practice. A tool that will allow **him** to make a digital scan of the feet, the Associate™ Platinum helps the doctor to screen for imbalances that contribute to problems in any number of places, like your knees, hips, and low back — even if your feet don't hurt!

Your feet are the foundation for your entire body. Like any structure, your body's foundation must be balanced to support the weight above it. If the arches in one or both of your feet collapse, your body doesn't get the correct postural support, causing an imbalance in your skeletal frame. The Associate™ Platinum helps chiropractors develop care plans and use postural support, like custom-made orthotics from Foot Levelers, to obtain positive results in nearly everyone — from children to seniors.

Dr. **Surrusco** welcomes new patients to **Clarendon Chiropractic Center** for postural exams to determine their chiropractic needs. The clinic offers a variety of therapies for total body health and provides on-site screenings with the Associate™ Platinum at health fairs and other community events.

If you've never had your feet scanned, you probably don't know what they are supposed to look like. Don't wait for aches and pains to tell you there is a problem.

Call Dr. **Surrusco** at **630-455-0435** now to schedule an appointment, and learn how your feet can affect your health!! Your entire body will thank you!
